Kay Pictures Pediatric Test Sets

Six And Three Meter Acuity Tests

This test provides 22 pictures with a choice of three or four different figures at each acuity level. The side index identifies the picture and the acuity size. The child simply names a selection of pictures from the flip-over book until their best achieved acuity is achieved. Pictures are designed and graded like Snellen letters and are proven accurate to within one line of Snellen’s acuity. Recognition books are provided to help familiarize the child with the pictures before testing. Both the 6 meter and the 3 meter sets include the distance test book, a near test card and three recognition booklets. 2 to 5 years old.

5960 Six Meter Kay Pictures Book Set
5961 Three Meter Kay Pictures Book Set

Single LogMAR Book Set

The single LogMAR book is suitable for testing children from about two years of age by naming pictures or by matching which is usually possible by two and a half years. The test is designed for use at three meters (10 feet). Optotype sizes are: 1.0 (3/30 or 10/100), 0.90 (3/24 or 10/80), 0.80 (3/19 or 10/63), 0.70 (3/15 or 10/50), 0.60 (3/12 or 10/40), 0.50 (3/9.5 or 10/32), 0.40 (3/7.5 or 10/25), 0.30 (3/6 or 10/20), 0.20 (3/4.8 or 10/16), 0.10, (3.3.8 or 10/12.5), and 0.00 (3/3 or 10/10) with a choice of three or four different pictures at each of the eleven acuity levels. A side index allows you to choose the size and picture before flipping the page to face the child. The acuity level is easily read from the index for recording in either LogMAR or Snellen in meters and feet with full instructions printed inside the book. Set includes the distance test book, a near test card, and key card. Size 9 x 9 inches (23 x 23 cm). Use with 2 to 5 years old.

5522 Single LogMAR Kay Pictures book set

3 Meter Crowded Book

This book combines the accuracy of a linear test and LogMAR sizing with the ease of naming or matching pictures. Intended for pre-reader children. Key card can be used to prompt shy or uncooperative children. Ideal for children 3 years to 6 years. Uses eight pictures in groups of four. Each eye can be tested with a different arrangement of the pictures for excellent comparison. The size index identifies the acuity size in LogMAR and Snellen. The range for LogMAR is 1.0 to -0.1 and Snellen 10/100 to 10/8 ft. (3/30 to 3/2.4 Meters). Optotype sizes are: 1.0 (3/30 or 10/100), 0.90 (3/24 or 10/80), 0.80 (3/19 or 10/63), 0.70 (3/15 or 10/50), 0.60 (3/12 or 10/40), 0.50 (3/9.5 or 10/32), 0.40 (3/7.5 or 10/25), 0.30 (3/6 or 10/20), 0.20 (3/4.8 or 10/16), 0.10, (3.3.8 or 10/12.5), and 0.00 (3/3 or 10/10) with a choice of three or four different pictures at each of the eleven acuity levels. A side index allows you to choose the size and picture before flipping the page to face the child. The acuity level is easily read from the index for recording in either LogMAR or Snellen in meters and feet with full instructions printed inside the book. Set includes the distance test book, a near test card, and key card. Size 9 x 9 inches (23 x 23 cm). Use with 2 to 5 years old.

Kay Pictures Patching Solutions

Kay Magic Patch

Magic Patches are film occluders to be applied to the child’s RX. Each layer of film reduces distance visual acuity by 3 to 4 LogMAR sizes. You can use several layers to achieve the occlusion desired.

Simply peel the backing paper and attach to the inside surface of the lens that you wish to occlude. Press the shiny side of the Magic Patch to the outside surface of the appropriate lens and mark the outline of the lens onto the backing paper. Then cut out your Magic Patch shape and peel away the backing paper. Finally, press and smooth Magic Patch firmly onto the inner lens surface. If two or more layers are required, press these together before applying to the spectacles.

The patch can be easily removed and re-attached repeatedly. It may help to moisten the film surface when re-using. Each package includes six 16cm x 6.5cm (6 x 2.5 inches) strips. Includes enough material for up to 30 single layer uses.

Kay Magic Patch - Package of 6 strips

Kay Pictures Slip-over Fun Patches

Kay Fun patches are the perfect way to make occluding successful and enjoyable for children who wear spectacles (or are willing to wear Plano frames). With dozens of different colors and designs made in soft material, there are bound to be many patterns that appeal to any child.

Kay Fun patches attach at the temple and nose piece and are shaped to follow the contour of the child’s face, ensuring proper occlusion. One size fits most frames that have separate nose pads. Patches can be hand washed and air dried. Pattern assortment may vary.

Kay Stick-on Exam Occluders

Kay Stick-on Occluders adhere to any child’s glasses during the exam. Let the child select among the 4 designs. Simply press the child’s preferred design onto lens and peel off after exam. Stick-ons do not stick to the skin or hair. They do not leave any residue on the glasses. Kay Stick-ons can be used over and over again. Wipe occasionally with a damp cloth to retain its stickiness. Sold as an assorted package of three assorted.

5945 Three Stick-on Occluders in wallet -

Sunflower Occluding Glasses

Kay Pictures Orthoptic Exercises

Near Point Dot: Accommodation Cards
These double sided dot and letter cards are used to measure the near point of convergence and accommodation. They can also be used for home exercises. The range is 6 cm to 24 cm. Full, clear instructions for the practitioner to teach the patient are included. Comes as a - Pack of 50

5524 Near Point Dot: Accommodation Cards

Rainbow Readers: Visual Motor And Perceptual Skills
These VMPS1 booklets contain a series of exercises to improve tracking and hand-eye coordination in children who struggle with letter/word reversal, lose their place when reading or guess or skip words. Two different levels are offered. Poor developmental eye movement or slow reading test results indicate these exercises may be helpful.
Symbols are used to help the visual discrimination and orientation skills needed for reading. They are graded in 12 sizes and spacing levels and divided into two booklets, according to the severity of the tracking problem. Level 1 has larger symbols for younger children and those with severe difficulties and Level 2 has the more challenging, smaller sizes. This provides a comprehensive treatment for children age five years and above. Full practitioner and patient instructions are included.
VMPS Book 2 contains treatments to help with letter and number confusions. Symbols and some letters are used in several fun exercises and games to develop visual memory, visual sequential memory, visual spatial relationships and directionality. Full practitioner and patient instructions are included. Exercises may be reproduced.

Dominant Eye Test
It is important to know which eye is dominant in case it differs from the dominant hand. This condition, called cross laterality, is known to cause certain specific difficulties with reading, writing and telling left from right.
This box simplifies determination of the child’s dominant eye. The box is held at arm’s length and the child is asked to align the star in the circle while each eye is occluded. Only a ‘yes’ or ‘no’ answer is required. Full instructions are included. Includes unbreakable 9 inch White Occluder.
